REGIONAL DISTRICT OF NANAIMO
RECREATION AND PARKS

MEMORANDUM

TO: Summer Camp Participants **DATE:**

FROM: Recreation Programmer & Summer Coordinator

SUBJECT: **Chicken Pox**

Dear Parents and Participants:

Today, , we had a phone call that informed us that a child who has been attending our Playground, had developed chicken pox last night. The child has stayed home today because of the chicken pox.

Please read the following information from the Health Clinic, so that you can determine if your child may have or be susceptible to chicken pox.

“Chicken Pox is usually a mild disease, particularly in children. Some people, however, have a high fever, feel very tired and may have thousands of blisters with some in the mouth, ears, and eyelids” (Ministry of Health and Ministry Responsible for Seniors handout).

We hope that your child does not have chicken pox this summer, but it is important for us to take precautions and inform all participants.

If you have any questions, please contact us at 248-3252.

Thanks
